## The Ageless Wisdom Teaching

*An introduction to  
humanity's spiritual legacy*

According to Benjamin Creme, esotericism is the science and philosophy of the accumulated wisdom of the ages -- but dynamic rather than static in its application -- and concerns itself with the evolutionary process both in man and the lower kingdoms in nature. Collectively this body of spiritual writings is called the Ageless Wisdom teachings. It is the study of the laws and energies that govern the visible and invisible universe and of gradually learning to understand and master those laws and energies. For over four decades British painter Benjamin Creme toured the world, speaking to large audiences and heralding the appearance of the world teacher, Maitreya.
